

**ATCOPETRO**

ESTABLISHED 1974 · KUWAIT

---

# Five Decades at the Heart of Kuwait's Energy Sector

## Capabilities Statement

Energy solutions contractor, agent for international manufacturers, and investor and project partner across Kuwait, the GCC and international markets. ISO 9001 certified.

00965 69027390 · [info@atcopetro.com](mailto:info@atcopetro.com) · [atcopetro.com](http://atcopetro.com)

# An unbroken record since 1974

ATCOPETRO was founded in Kuwait in 1974 and has operated without interruption since — through the nationalisation of the State's hydrocarbon resources, the Gulf War and the reconstruction that followed, and the downstream transformation of the last two decades. Headquartered in Kuwait City, the firm works across the GCC and internationally.

The company operates simultaneously as a services and products contractor, as agent and representative for established international manufacturers, and as an investor and project partner with ownership positions in regional energy ventures. Core service lines span consultancy, conceptual design, project management, equipment supply, start-up and commissioning, crude oil and petroleum product supply, and strategic storage solutions.

## Milestones

- 1974** Founded in Kuwait, as the State began asserting sovereign control over its hydrocarbon resources.
- 1980s** Expansion into agency work, representing international manufacturers across Kuwait and the GCC.
- 1990s** Continuity of service through the Gulf War and the reconstruction of damaged production facilities.
- 2000s** Growth in strategic storage, project management and commissioning during downstream transformation.
- 2010s** Qatar and wider GCC mandates across LNG, petrochemical, steel and utilities operators.
- Today** Contractor, manufacturer's agent and investor with ownership stakes in regional energy ventures.

# Capabilities

## Hazard & Risk Management

Hazard identification, HAZOP facilitation and quantitative risk assessment on live hydrocarbon facilities, written to be acted upon within a turnaround window.

- HAZID / HAZOP facilitation and close-out tracking
- Quantitative risk and consequence modelling
- Fire, gas and emergency response review
- Compliance support for regulatory and client audits

## Oil & Gas Processing

Conceptual design, optimisation and debottlenecking from gathering centres and separation trains through gas plants and refining units.

- Conceptual and front-end design
- Debottlenecking and throughput studies
- Start-up, commissioning and performance testing
- Operating envelope and reliability reviews

## Electricity & Power Plants

Generation and distribution assets for continuous-demand industrial and hydrocarbon facilities, including utilities integration and load studies.

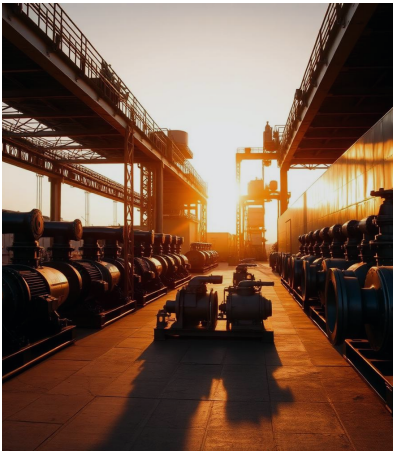

- Generation and distribution equipment specification
- Utilities integration for process facilities
- Commissioning and performance verification
- Long-term spares and maintenance planning

## Strategic Storage Solutions

Siting, feasibility, tankage and terminal design support, procurement and the operating regime that keeps stored product within specification over long horizons.

- Feasibility, siting and capacity studies
- Tankage and terminal equipment procurement
- Product quality and custody transfer systems
- Commissioning and operational handover

## Equipment Supply, Trading & Procurement

Agent and representative for established international manufacturers, with technical accountability for equipment placed on site, and trading in crude and products.

- Agency and representation for international manufacturers
- Process, rotating and safety equipment supply
- Crude oil and petroleum product supply
- Vendor qualification and expediting

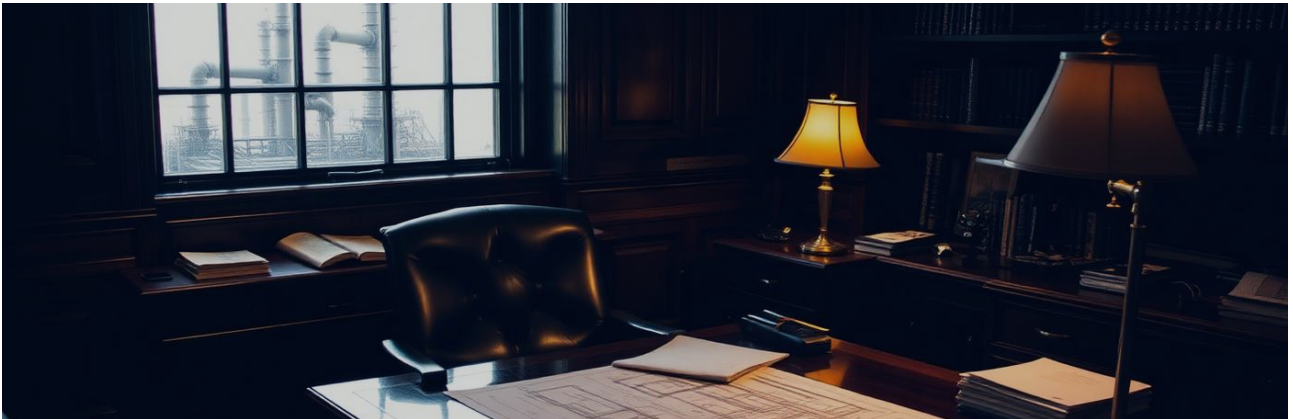

## Feasibility, Troubleshooting & Maintenance

Independent feasibility and economic studies, and diagnostic programmes for installed assets whose performance has drifted from design intent.

- Feasibility and economic evaluation
- Root-cause troubleshooting on operating plant
- Repair, maintenance and overhaul programmes
- Post-intervention performance verification

# Leadership

---

## Dr. Alpark — Founder

A dual-PhD engineer in Petrochemical Engineering and Refining from the Colorado School of Mines, the founder has led the firm since 1974. The technical judgement that established the company remains directly involved in mandates: reviews are led, not delegated, and recommendations carry the accountability of the person who signs them.

That continuity is the firm's principal asset. Half a century of exposure to Kuwaiti crude characteristics, regional feedstocks, operating cultures and regulatory expectation is held as institutional memory rather than rediscovered on each assignment — which is why clients return with problems that have already defeated a specification-driven approach.

# Institutional Relationships

Relationships across the KOC / KNPC / KPC ecosystem and the wider GCC have been earned over decades of delivery rather than acquired. A representative register follows.

## KUWAIT · OIL & GAS

Kuwait Oil Company (KOC)  
Kuwait National Petroleum Company (KNPC)
